

Notes:

- Your main page should be named `index.html`.
- You can update your site anytime by pushing new files to the repository.
- GitHub Pages supports static sites (HTML, CSS, JS). No server-side code.

If you want, I can help you with Git commands or troubleshooting! Just ask.

Plz give me my files

BLACKBOXAI

Sure! Here is your complete gaming website code as a single HTML file. You can save this as `index.html` and upload it to GitHub Pages or any web host:

html 402 lines

```
<!DOCTYPE html>
<html lang="en">
...

```
